

Tribeca System

Tribeca is a modular and flexible collection of emphasized dimensions, intended for spacious interiors. Big feather-filled cushions add to the comfort of this collection's pieces. The elements of this system that are readily connectable in all directions, enable creation of an infinite number of spatial compositions, equally functional in either private or public contexts. The dynamic visual rhythm of the pieces' backside accentuates Tribeca's design. The pieces of

exaggerated size and geometric arcs are designed as flexible and separate structures, making Tribeca a sitting arrangement capable of reshaping the new complexity of the modern living marked by excessive planning.
